Date December 2021
Subject Reminder: your final HPV vaccination

Enclosure(s)
Child and Youth Health
Services letter
Vaccination card(s)

Dear xxxxx,

Six months ago, we sent you an invitation for your final HPV vaccination against the human papilloma virus (HPV). According to our records, you have not yet received this vaccination. We therefore invite you to get this vaccination now. After this vaccination, you will be effectively protected against the cancers that can be caused by HPV.

Any questions?

If you have any questions or are nervous about the vaccination, you can chat with a doctor or nurse at your local Youth and Family Centre every day at JouwGGD.nl. You can also find a great deal of information about HPV at rijksvaccinatieprogramma.nl/english.

Where and when can you get vaccinated?

The invitation with this letter tells you where and when you can get the final vaccination. The vaccination is free. You should discuss the vaccination with your parent(s) or guardian(s). Bring your vaccination card and vaccination certificate with you to the appointment. You received the vaccination certificate at your first vaccination appointment a year ago.

Have you already received all vaccinations against HPV?

If this is the case, take a scan or photo of the completed vaccination certificate. You can send this scan or photo to us by email or by post to the return address at the top of this letter.

Yours sincerely,

Jeanne-Marie Hament MD

Manager, RIVM National Immunisation Programme
